

	<p>You start a session at a charging point using a registered RFID card.</p> <p>An overview of registered mobility service providers can be found at <a href="http://www.be-emobil.de">www.be-emobil.de</a></p> <p>To start a session, hold your RFID card in front of the RFID symbol beneath the display on the front of the charging point.</p>
	<p>After successful authorization the charging point is ready and the sockets are opened. Plug your charging cable into either the right or the left side.</p>
	<p>Now connect your charging cable to your EV.</p>
	<p>As soon as the connection between the vehicle and the charging point is established, the charging cable will be locked and the charging process will start.</p>
	<p>You can end the charging process by again holding your RFID card in front of the RFID symbol. The plug will be unlocked.</p>
	<p>The plug attached to the EV can now be pulled out.</p>
	<p>Pull the plug out of the charging point. Have a good trip!</p>
