

Charging at an AC Charge Pole

How to use the charge pole

- Authenticate at the charge pole by placing the RFID card or tag of the charge card provider in front of the RFID symbol (1). If the authorization was successful the sockets will be made available.
- Plug in your charging cable (2) into the socket at the left or right side of the charging station.
- Connect the charging cable to your car (3). When the car and charge pole are connected the cable will be locked and the charging session starts (4).
- Stop the charging session by placing your RFID card or token in front of the RFID symbol (5). The socket unlocks the cable.
- Unplug the cable at the car (6) and at the charge pole (7).
- If you encounter problems, please call our service desk.
