

Charging at a Fast Charging Station

How to use the charging station

- Authenticate at the charge pole by placing the RFID card or tag of the charge card provider in front of the RFID symbol **(2)**. If the authorization was successful select the connector type of the vehicle by pushing the according button next to the display and follow the prompts **(3)**.
- Connect the selected connector to the vehicle **(4)**. The charging session starts **(5)**.
- When the battery is fully charged or to stop charging, authenticate again by placing your RFID card or token in front of the RFID symbol and follow the prompts on the display **(6)**.
- Remove the connector from vehicle **(7)** and replace it in the holder of the charging station **(8)**.
- The charging station will return to a locked state **(9)**.
- If you encounter problems, please call our service desk.
